THE LIFE SILIFFE PROJECT

The management of cross-border water bodies: comparing experiences

The management of cross-border water bodies: comparing experiences

Friday 16th November 9.30 a.m.
Cinema-Theater of Tolmin

The **Life SILIFFe** Project deals with the protection of the river Sile, the management of the river to guarantee its ecological functionality, fish restocking and the control of invasive alien fish species.

the management of a water body must be carried out with attention taking into consideration the ecological role, the indigenous species and the increasing presence of invasive exotic species, the perfluvial habitat.

The conference will be an interesting opportunity for discussion among speakers from Italy and Slovenia, who have participated in various Life projects or that manage water bodies.
